Destination Toulouse, France

Between the Mediterranean sea and the Atlantic Ocean, Toulouse is a city of research, education, culture and quality lifestyle.

3 top class technical clusters

Aerospace Valley, world center in aeronautics and space

Agrimip Innovation, dedicated to agriculture and the agro-food industry

Cancer Bio Santé, specialized in health and Biotechnologies

Toulouse « the pink city »

A cultural heritage, a prestigious « red and black » rugby team, the South-West atmosphere with delicious culinary specialties.

2nd largest university city in France

115 000 students

3 universities and 17 « Grandes Ecoles »

PURPAN

Tradition

An historical site in the heart of the city center
A castle in a 40 Ha park

Modernity

Innovative facilities
Easy access by public transportation, the motorway and from the airport

Anchored in its roots and its values, PURPAN ensures high level graduate capable of adapting to a changing world and anticipating new challenges.

The fundamental intersection between 3 pillars: student companies and faculty is essential to develop our students' skills allowing them to be well-educated by placing them in the heart of action.

All share our common values, amongst which are participation, solidarity and a mission to serve.

In this context, students will be the future, develop their potential and share their responsibility as committed persons.

Through the development of individual tutoring, participation in research units, regional and national networks, international partnerships, PURPAN gives its students the opportunity to identify their strong points and make their whole life a success.

This is the heart of our mission, the essence of the profession and human project we invite you to participate in.

Michel Roux
Dean of PURPAN

With strong agricultural and historical roots, going back to 1919, PURPAN, under the Jesuit community, has encouraged the development of active and dynamic men and women through personal commitment, solidarity and strong ethical standards.

Our educational philosophy for individual success is based on personal development through our constant attention to reveal the potential of each student to achieve his/her personal and professional goals.

PURPAN's laboratories and research teams develop scientific programs aimed at meeting the expectations of business. Our faculty is also involved in consulting activities.

PURPAN's excellence in these areas is one of its main strengths.

Research & Extension

Research activities, studies and consulting for PURPAN: an essential part of our mission aiming at providing services for businesses

- **Our mission:** to meet higher educational standards by carrying out finalized projects academically recognized by scientific publications.
- **Our objective:** a broad array of research, development, studies and consulting services for agricultural concerns and agribusinesses.

11 research teams

Microbial Agents and Health

UMR 1133 TOXALIM INRA / INPT / EI PURPAN

Biological and Technological Quality of Plant Raw Materials

UMR 1010 LCA INRA / INPT

From Grape to Wine Market Value and Enology

UMR 1010 LCA INRA / INPT

Remote Sensing and Land Management

UMR 1201 Dynafor INRA / INPT

Agriculture, Local Systems, Resources and Environment

UMR 1248 ACIR INRA / INPT

Company creation and Management

UMR 1248 ACIR INRA / INPT

Marketing, Market and Chain Management

PURPAN's farm

PURPAN owns and manages the 250 ha Lamotte farm, the largest experimental farm in the region, situated 20 km from Toulouse with 3 experimental stations, conducting research for companies:

- 130 dairy cows producing 1 200 000 litres of milk per year.
- Most of the region's crops are cultivated there (wheat, corn, sunflower, soybean, ...)
- An industrial free range laying-hen unit was established in 2005.

Becoming a graduate in 5 years

With ongoing mentoring throughout the five years of studies, students will benefit from a wide range of studies.

3 years of general studies

The first 3 years are dedicated to acquiring scientific knowledge and background to agricultural production (plants and animals) and processing methods. The students will also discover interactions between different dimensions of farm business, from a technical, economic and legal perspective.

2 years to acquire managerial skills

The following 2 years allow students to understand land management markets, environmental and economic issues. They spend at least one semester at a partner university or in an NGO in developing countries. They are trained to become project managers, produce data models, regulations, and manage production. They will be able to run a business, with sufficient knowledge in Marketing, Management, Finance, Accounting and Law.

BACHELOR CYCLE OBSERVE - ANALYZE MASTER CYCLE PROPOSE - DECIDE

- ES Engineering Sciences
- EM Economics/ Management/Law
- AE Agronomy/ Agriculture/Environment
- CL Communication/ Languages

- LS Life Sciences
- M Marketing/Business/ Retail
- F Food Science and Technology
- S Sociological Personal Development

Highly qualified and committed faculty

Approximately 60 permanent members of faculty, all with high-level skills and almost 70% of whom have a PhD, carry out recognized scientific research. They have been trained in mentoring and are committed to supervising students and helping them to fully realize their potential.

Over 200 professionals, selected for their excellence in the educational and professional worlds add to the richness and diversity of the teaching staff.

Internships

Internships are a very important part of PLUP curriculum. Students have the opportunity to test their theoretical knowledge in real life situations.

- 4 important milestones:
 - During their first year, students develop observational skills on a farm, discovering a new social and professional environment: (12 weeks)
 - During their second year, an internship abroad in an agricultural business offers an opportunity to practice their language skills, gain international experience and work in agriculture (10-12 weeks)
 - The third year internship brings students into contact with French businesses and social organizations (10-12 weeks)
 - The six-month final year internship places the student in a senior position. A Master thesis on the research conducted is then written and defended. (26 weeks)

Student life

Accommodation

We can provide a large choice of accommodation options in the private sector and a few university residence rooms. Prices range from 300 to 450 euros per month for a furnished room with access to kitchen and bathroom in a shared apartment or with families.

700 to 800 euros per month needed for total expenses (incl. food, accommodation, local transportation and other personal costs).

Local transportation

PURPAN is only 4 kilometers away from the heart of Toulouse.

Tramway and bus stops are a walking distance from the school.

Clubs and sports

PURPAN has various facilities for soccer, rugby, tennis, basketball, volleyball, handball and badminton.

The Student Union is in charge of managing specific facilities and clubs: the students' common room, sports facilities, photography, music, theater, hiking, cinema, conferences.

Students who are passionate about oenology can attend wine tasting theme events organized by the school's wine club.
